

Pierry Borges

Software Engineering Manager | São Paulo, Brazil | pieerry@gmail.com | [LinkedIn](#) | pierry.github.io

TECHNICAL SKILLS

Leadership: Multi-team Engineering Leadership, Engineering Managers Development, Tech Strategy, Roadmap, Headcount Planning, Stakeholder Management
Architecture: Microservices, Event-Driven Architecture, Distributed Systems, Server-Driven UI, Multi-Module Architecture, Systems Design
Cloud & Infra: AWS, Google Cloud, Azure, CI/CD, Observability, SRE Practices, Harness
Operations: SPACE, DORA, Incident Management, Reliability, Cost Efficiency
Languages: Java, Kotlin, Swift, Python, .NET, TypeScript
AI-First: Claude Code, Skills, Harness

EXPERIENCE

Software Engineering Manager May 2023 – Present
Intelipost
São Paulo, Brazil
Logistics Tech – Core Business Unit

- Lead 3 AI-First engineering squads on event-driven, microservices platform tied to client conversion, owning features that drive new customer acquisition and retention
- Built T-shaped engineering culture with P&L accountability, partnering with Product, Data and Operations to prioritize by revenue impact and translate technical decisions into business outcomes
- Established DORA and SPACE metrics, reducing cycle time and increasing deployment frequency; drove SRE and observability practices across squads

Engineering Manager June 2022 – May 2023
PicPay
São Paulo, Brazil
Fintech – Social Product (20M MAU)

- Led engineering for the Social product at fintech scale (20M MAU), navigating high concurrency, data consistency and regulated financial environment
- Built high-performing T-shaped team from scratch with goals tied to business impact; shaped OKRs/KPIs across mobile and backend stacks (Kotlin, Swift, Java)

Engineering Manager Jan. 2020 – June 2022
Grupo Fleury
São Paulo, Brazil
Healthtech – Mobile Apps

- Led 5 engineering teams during hypergrowth, managing tech leads and senior engineers, owning roadmap, headcount planning, talent attraction and retention
- Partnered with Product, Risk and Compliance stakeholders to deliver predictable roadmaps in a regulated healthcare environment

Staff Software Engineer Dec. 2018 – Dec. 2019

- Scaled mobile app from 40k to 1M+ users with Server-Driven UI and multi-module architecture; reduced maintenance team by 50%

Mobile Architect Sep. 2018 – Dec. 2018
4bus
São Paulo, Brazil

- Designed app architecture from scratch with feature flags and tracking standards; contributed to top 3 transportation app ranking in Brazil

Senior Technical Lead Android / Mobile Engineer Sep. 2016 – Aug. 2018
Expense Mobi
São Paulo, Brazil

- Led architectural decisions for a team of 3; implemented deployment strategies, feature flags, and tracking

Mobile Engineer Apr. 2016 – Oct. 2016
Deloitte
São Paulo, Brazil

Mobile Engineer Mar. 2014 – Mar. 2016
JR Automação Comercial
Itapema, Brazil

Full Stack Engineer Feb. 2012 – Mar. 2014
DC Logistics Brasil / Ravea
Brazil

EDUCATION

Pontifícia Universidade Católica do Paraná Paraná, Brazil
IT Management
2022 – 2024

Avantis / Universidade do Planalto Catarinense Santa Catarina, Brazil
Information Systems
2009 – 2014
